Purpose of Flight:	Check						
Comments:	The TOGA probe that created the "hum" was replaced with a different probe that was flow during KORUS farther aft along the fuselage. The "hum" did not return, however, the wake flow off this large fairing was determined by video to be unacceptable for AMP data. After the flight, the TOGA probe was removed, a window blank was installed in that place, and a pneumatic line from AMP was run to TOGA to process the air. The aircraft came back in good condition.
